Microsoft has cost my father a couple of jobs, I have lost opportunities because of them. If I am going to say anything that sticks with you it is hack them up like at&t/ma-bell, if anyone is going to believe in the justice system it is on your heads. some of the things microsoft has done, and continues to do, I think could land someone like me in prison for life. but since they have so much money and influence they are getting a slap on the wrist. do you think people will believe in the justice system if the wealthy and powerful can walk all over it, but joe blow you or I die by it.

Where is our david.....? We have a rampaging Goliath!
